SAKATA

[Company Motto]

Quality, Reliability, Service

The company motto is comprised of three principles, "Quality, Reliability, Service", which signifies Sakata's spirit. Deeply inspired by these principles, we made it a priority for the past 10 decades to realize this philosophy in the mutual prosperity among our three stakeholders- Customers, Suppliers and Sakata. With the Mutuality of Interests established between Employees, Management Team and our Stockholders, our Mutual Prosperity will continue into the next 100 years.

(Management Philosophy)

Mutual Prosperity & Mutuality of Interests

P A S S I O N in seed

Our "PASSION in Seed" has remained constant through the years since our foundation in 1913. "PASSION in Seed" is encoded in Sakata's DNA and has been inherited through the generations spanning the last 100 years. The letters in the word "PASSION" each have a profound meaning.

GREEN MAGIC

GREEN MAGIC

Segment : Calabrese (Single Head)

Plant : Strong vigorous plant with erect leaves

Curd :

- Dome shaped bluish green curd with good compactness
- Small to medium sized beads
- Average curd weight is 350 to 400 g

Maturity : 55 to 60 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

SAKI

SAKI

Segment : Calabrese (Single Head)

Plant : Strong vigorous plant with erect leaves

Curd :

- Perfect dome shaped bluish green curd with excellent compactness
- Small to medium sized beads
- Average curd weight is 400 to 500 g

Maturity : 65 to 70 Days

Broccoli
Lovers

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

MELODY

MELODY

Segment : Chinese Cabbage

Plant : Strong vigorous compact plant frame

Head :

- Attractive barrel shaped head excellent external and yellowish internal light green colour
- Head weight is 2.0 to 2.5 kg
- Good heat and rain tolerance

Maturity : 55 to 60 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

IRANE

IRANE

Segment : Flat Round

Plant : Early hybrid with dark green, erect leaves and no bolting

Bulb :

- Flat round, Smooth bulb with attractive light green colour
- Excellent uniformity in size maturity
- Bulb weight : 150 to 200 g
- Bulbs are fibre less having excellent taste and flavour
- Good heat and rain tolerance

Maturity : 50 to 55 Days

QUICK STAR

QUICK STAR

Segment : Flat Round

Plant : Early hybrid with dark green, erect leaves and no bolting

Bulb :

- Flat round, Smooth bulb with attractive light green colour
- Excellent uniformity in size and maturity
- Bulb weight : 15 to 200 g
- Bulb are fibre less having excellent taste and flavour
- Good heat and rain tolerance

Maturity : 30 to 35 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

SUPER HELMET

SUPER HELMET

Segment : Semi Flat Round

Plant: Medium maturity hybrid with dark green foliage

Head :

- Uniform, compact and semi-flat head
- Head weight : 1 to 1.2 Kg
- Good heat & rain tolerance

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

GREEN MASTER

GREEN MASTER

Segment : Semi Flat Round

Plant : Dark green foliage with very good plant

Head :

- Uniform, semi to flat and compact head
- Head weight : 1.1 to 1.3 kg
- Good field holding ability

Maturity : 75 to 80 Days

GREEN STAR-0466

GREEN STAR-0466

Segment : Semi Flat Round

Plant : Vigorous and Compact Plant
Frame with attractive dark green leaves

Head :

- Ball Shaped highly compact head
- Good Heat and Rain tolerance
- Head weight : 0.8 to 1.2 Kg

Maturity : 60 to 65 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

PUMA

PUMA

Segment : Round

Plant: Strong Plant vigour with good foliage

Head :

- Early hybrid with bluish green head
- Firm, uniform & ball shaped head
- Head weight : 0.8 to 1.0 Kg
- Suitable for long transportation

Maturity : 50 to 55 Days

RICO

RICO

Segment : Round

Plant : Small to medium plant frame

Head :

- Robust bluish green leaves
- Round shape with compact and attractive head
- Head weight : 0.8 to 1.2 Kg
- Uniform head maturity

Maturity : 55 to 60 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

CHARIOT-0452

CHARRIOT-0452

Segment : Round

Plant : Bluish Green foliage

Head :

- Bluish green compact round shape head
- Head Weight : 0.9 to 1 Kg
- Good field Holding capacity 15 to 20 Days

Maturity : 50 to 55 Days

GREEN EXPRESS

GREEN EXPRESS

Segment : Round

Plant : Vigorous plant with dark green foliage

Head :

- Compact, uniform and round head
- Medium size and very firm head with good taste

- Head weight : 1.2 to 1.5 Kg

- Suitable for early market

Maturity : 55 to 60 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

GREEN STONE

GREEN STONE

Segment : Round

Plant: Early maturing hybrid with green head color

Head :

- Uniform, round and very compact Head
- Head weight : 1.2 to 1.5 Kg
- Suitable for long transportation

Maturity : 65 to 70 Days

GREEN GALAXY

GREEN GALAXY

Segment : Round

Plant : Vigorous plant with dark green foliage

Head :

- Medium size, uniform and round shape head
- Excellent compactness
- Head weight : 1.2 to 1.5 Kg
- Good field holding ability

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

CHARMANT

CHARMANT

Segment : Round

Plant : Mid Maturity hybrid with bluish green color leaves

Head :

- Uniform, round and medium size head
- Head weight : 1.0 to 1.2 Kg

Maturity : 60 to 65 Days

GREEN SOCCER-0546

GREEN SOCCER-0546

Segment : Round

Plant: Strong Plant vigour with good foliage

Head :

- Compact, round head with bluish green leaves
- Head weight : 1.2 to 1.5 Kg
- Excellent field holding ability

Maturity :

65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

RED JEWEL

RED JEWEL

Segment : Red Cabbage

Plant: Strong, Vigorous, Erect plant type with attractive purple leaves

Head :

- Compact round shape head
- Attractive reddish purple coloured head
- Head weight : 0.8 to 1.2 Kg
- Excellent field holding ability of more than 25 days after maturity
- Good market acceptance and price

Maturity : 70 to 75 Days

ROYAL VANTAGE

ROYAL VANTAGE

Segment : Round

Plant : Vigorous, strong and large plant frame

Head :

- Dark bluish green shiny leaves.
- Compact and round head
- Head weight : 1.2 to 1.5 Kg
- Good Field holding ability
- Suitable for long transportation

Maturity :

70 to 75 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

GREEN KAVACH-5124

GREEN KAVACH-5124

Segment : Round

Plant : Vigorous plants with green foliage

Head :

- Compact with very good head uniformity
- Head weight : 1 to 1.2 Kg
- Very good field holding ability up to 25 to 30 days

Maturity : 55 to 60 Days

NEW

GREEN PRIDE-5126

GREEN PRIDE-5126

Segment : Round

Plant : Vigorous plant with dark green foliage

Head :

- Compact with very good head uniformity
- Head weight : 1 to 1.3 Kg
- Very good field holding ability up to 20 to 25 days

Maturity : 60 to 65 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

WHITE TREASURE

WHITE TREASURE

Segment : Tropical to Subtropical

Plant : Strong plant type

Curd :

- White, compact and dome shaped curd
- Curd weight : 0.6 to 0.8 Kg
- Good heat and rain tolerance

Maturity : 50 to 55 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

WHITE MARBLE

WHITE MARBLE

Segment : Subtropical

Plant : Sub-tropical hybrid with strong plant type

Curd :

- White coloured, compact and semi dome shaped curd
- Curd weight : 500 to 600 g
- Good rain tolerance

Maturity : 50 to 55 Days

WHITE CRYSTAL

WHITE CRYSTAL

Segment : Subtropical

Plant : Strong plant type

Curd :

- White compact & dome shaped curd
- Curd weight : 0.8 to 1.0 Kg

Maturity : 60 to 65 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

WHITE WONDER

WHITE WONDER

Segment : Subtropical

Plant : Strong plant type

Curd :

- Dome shaped, white colored curd with good compactness
- Curd weight : 1.0 to 1.2 Kg
- Excellent curd quality with wider adaptability

Maturity : 60 to 65 Days

YUKI

YUKI

Segment : Subtropical

Plant : Very strong plant type

Curd :

- White, Compact and Dome shaped curd
- Excellent self covering
- Curd weight : 1.0 to 1.2 Kg

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

WHITE DEX

WHITE DEX

Segment : Temperate

Plant : Vigorous strong plant with good self-cover

Curd :

- White, compact and Dome shaped curd
- Excellent self covering
- Curd weight : 1.2 to 1.5 Kg

Maturity : 70 to 75 Days

NEW

WHITE BLOOM-1008

WHITE BLOOM

Segment : Temperate

Plant : Strong vigours erect plant type

Curd :

- Bright White color, compact, Dome shape curd
- Curd weight : 1.3 to 1.5 Kg

Maturity : 70 to 75 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

WHITE QUEEN

WHITE QUEEN

Segment : Temperate

Plant : Strong, vigorous plant with excellent self-cover

Curd :

- White, compact and dome shape curd
- Curd weight : 1.5 to 1.8 Kg

Maturity : 70 to 75 Days

WHITE EXCEL

WHITE EXCEL

Segment : Temperate

Plant : Very strong plant type

Curd :

- Excellent self-cover
- Curd weight : 1.3 to 1.5 Kg
- White, highly firm and dome shape curd
- Excellent field holding ability & suitable for long transport

Maturity : 70 to 75 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

FUJI TOP

FUJI TOP

Segment : Temperate

Plant : Vigorous strong plant with good self-cover

Curd :

- White, compact and Dome shaped curd
- Average Curd weight is 1.3 to 1.5 Kg

Maturity : 75 to 80 Days

WHITE EVEREST

Segment : Late Temperate

Plant : High vigours plant type with good self-cover

Curd :

- Dome shaped, white color curd with excellent compactness
- Curd weight : 1.2 to 1.5 Kg

Maturity : 80 to 85 days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

FORTUNE

FORTUNE

Segment : Tropical

Plant : Strong vigorous plant habit with good foliage

Root Bulb :

- Round to Globe shaped roots with good uniformity
- Smooth and glossy root surface with excellent internal colour and taste
- Good level of heat tolerance

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

KESTREL

KESTREL

Segment : Tropical

Plant: Strong vigorous plant habit

Root Bulb :

- Uniform round shape roots
- Excellent red color and internal quality
- Good field holding ability
- Suitable for fresh and processing market

Maturity : 60 to 65 Days

RED ACE

RED ACE

Segment : Tropical

Plant: Upright plant habit with excellent vigor and wider adaptability

Root Bulb :

- High yielding hybrid with uniform top shape
- Excellent interior red color and quality

Maturity : 55 to 60 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

GLOBE DARK RED

GLOBE DARK RED

Segment : Tropical

Plant: Strong plants with erect green leaves

Root Bulb :

- High yielding variety round shape roots with smooth exterior and uniform size
- Deep red interior and exterior root colour with very light zoning
- Excellent Heat tolerance

Maturity : 65 to 75 Days

RAIDON-3006

RAIDON-3006

Segment : Tropical

Plant: Strong plants with erect green leaves

Root Bulb :

- High yielding variety round shape roots with smooth exterior and uniform size
- Deep red interior and exterior root colour with very light zoning
- Excellent Heat tolerance

Maturity : 65 to 75 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

SAKATA-042

SAKATA-042

Segment : Nantes

Plant : Strong vigorous hybrid with green foliage

Root :

- Root length : 20 to 25 cm with width of 3.5 to 4.0 cm
- Less wastage and cracking
- Good market acceptance
- Good foliar disease resistance

Maturity : 70 to 75 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

ALISHA

ALISHA

Segment : Nantes

Plant : Strong & Upright plant habit with excellent vigor

Root :

- Smooth, cylindrical and uniform long roots
- Root length : 20 to 24 cm and width 3.0 to 3.5 cm
- Excellent dark orange external & Internal root color
- High yielding hybrid suitable for cold storage

Maturity : 90 to 95 Days

AHILYA-0047

AHILYA-0047

Segment : Nantes

Plant : Strong and vigorous erect plant type

Root :

- Attractive deep orange internal & external root colour
- Smooth root surface with flat crown
- Root Length : 20 to 25 cm and width of 3 to 3.5 cm

Maturity : 85 to 90 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

INSPIRE-0106

INSPIRE-0106

Segment : Desi Red

Plant : Strong and vigorous erect plant type

Root :

- Deep Red color cylindrical roots
- Root length : 27 to 32 cm and width 2.8 to 3.2 cm

Maturity : 80 to 90 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

PRINCE-1111

PRINCE-1111

Segment : Mino Early

Plant : Strong and vigorous plant

Root :

- Bright white colour and cylindrical root
- Root length : 30 to 35 cm and width 2.8 to 3 cm

Maturity : 45 to 50 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

SHIRO-0027

SHIRO-0027

Segment : Palak Patta

Plant : Strong and vigorous plant

Root :

- Bright white colour and cylindrical root
- Root length : 22 to 25 cm and width 3.5 to 4 cm

Maturity : 27 to 32 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

AMOLI-1647

AMOLI-1647

Segment : Red dry Thin Short

Plant: Strong spreading plant type with ChiLCV tolerance

Fruit :

- Fruit length 8 to 9 cm and diameter 0.9 cm
- Green firm glossy fruit
- High colour value and Pungency of red dry fruit

Maturity :

Green fruits : 60 to 65 Days

Red fruits : 90 to 100 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

BRAHMOS-1683

BRAHMOS-1683

Segment : Green Fresh Thin short

Plant : Vigorous strong plant with profuse branches

Fruit :

- Fruit length 8 to 9 cm and diameter 1.1 cm
- Lite Dark green, glossy, firm and pungent fruit
- Good shelf life of fruits
- Field Resistant to ChiLCV

Maturity : 65 to 70 Days

KAMADENU-3226

KAMADENU-3226

Segment : Green Fresh Thin Long

Plant: Strong vigorous semi erect plant

Fruit :

- Fruit length 13 to 15 cm and 1.2 cm diameter
- Dark green glossy fruit with high firmness
- High market acceptance and price

Maturity : 50 to 55 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

SUPREME HOT

SUPREME HOT

Segment : Green Fresh Thin Short

Plant: Highly vigorous plant with broad leaves

Fruit :

- Fruit length 8 to 9 cm and 1.1 cm diameter
- Dark green, glossy, very firm and pungent fruit
- Good shelf life of fruits
- 1st in the Market acceptance and price

Maturity : 65 to 70 Days

MAGNUS-0015

MAGNUS-0015

Segment : Bajji

Plant: Strong spreading plant
Suitable for open field and net house cultivation

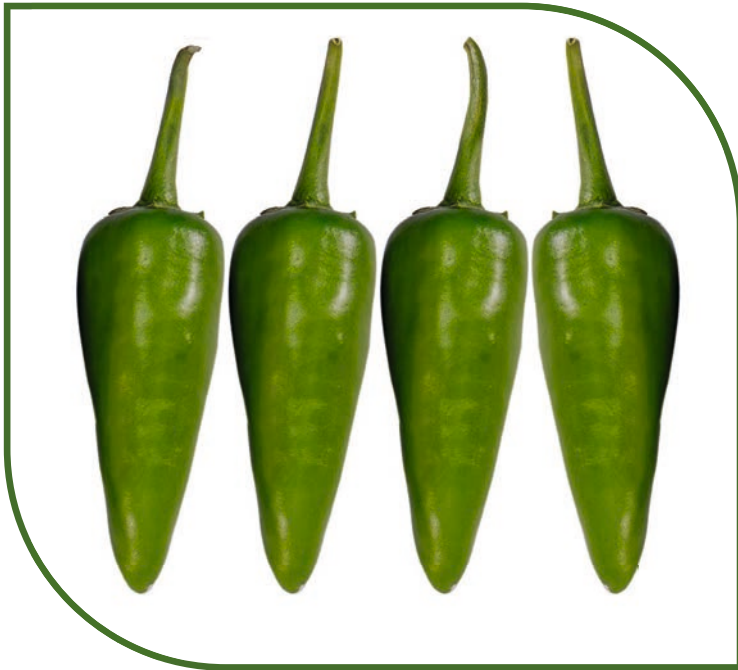

Fruit :

- Fruit length 15-17 cm and 3.0-3.5 cm diameter
- Yellowish green glossy firm fruit
- Good market acceptance and price

Maturity : 45 to 50 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

RAAMA-0012

RAAMA-0012

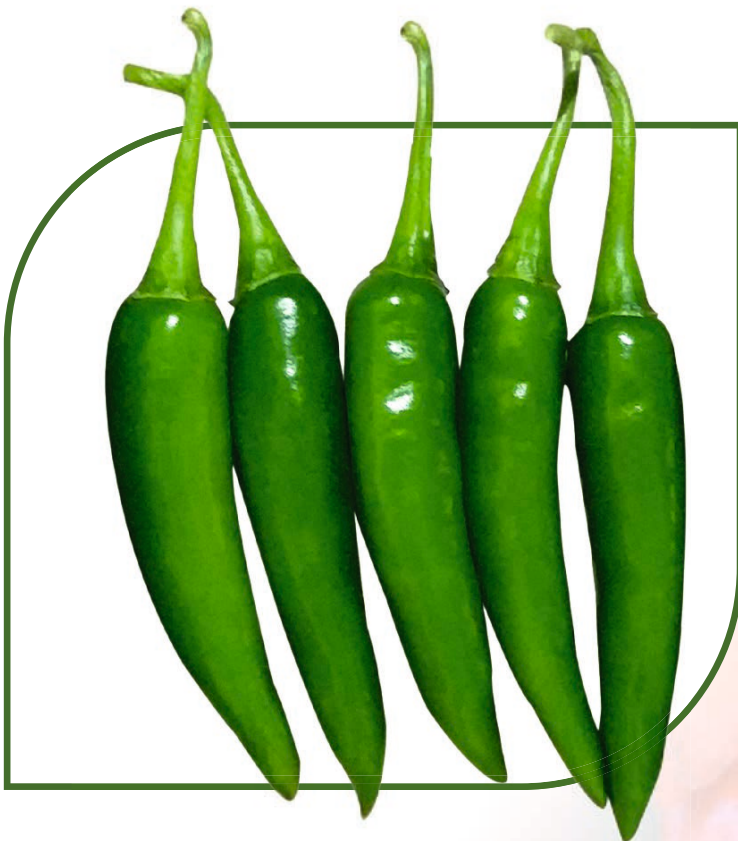

Segment : Bullet/ Mundu

Plant: Strong vigorous Erect plant with ChiLCV tolerance

Fruit :

- Fruit length 6 to 7 cm and 1.5 cm diameter
- Green glossy fruit with Very high firmness & Pungency
- High market acceptance and price

Maturity : 65 to 70 Days

SAIRA-3040

SAIRA-3040

Segment : Green Fresh Thin Short

Plant: Highly vigorous plant with ChiLCV tolerance

Fruit :

- Fruit length 6 to 7 cm with 1.3 to 1.4 cm diameter
- Green, glossy, firm and pungent fruit
- Good shelf life and Market acceptance
- Long duration harvesting

Maturity : 70 to 75 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

ROYAL RED-0119

ROYAL RED-0119

Segment : Red dry Thin short

Plant : Semi erect vigorous plant

Fruit :

- Fruit length 9 to 10 cm & 1 to 1.1 cm diameter
- Pungency Value 50000 to 60000 SHU & Color Value 70 to 80 ASTA
- Good fruit store ability
- Field tolerance to virus disease
- 1st in the market acceptance and price

Maturity : 100 to 110 Days

BYADGI-1257

BYADGI-1257

Segment : Red dry Thin long

Plant: Semi erect vigorous plant

Fruit :

- Fruit length 14 to 15 cm & 1.2 cm diameter
- Green colour glossy firm fruits
- Pungency value of 55800 SHU & Colour value of 111 ASTA
- Fruits storability >9 months

Maturity :

Green fruits : 70 to 75 Days

Red fruits : 100 to 110 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, sowing season, agro-climatology & crop management.

RED HOT-2090

RED HOT-2090

Segment : Red dry Thin short

Plant: Semi erect vigorous plant

Fruit :

- Fruit length 8 to 9 cm & 1 cm diameter
- Good red dry colour with high pungency
- Excellent storability
- Good market acceptance and price

Maturity : 100 to 110 Days

RED HOT+0728

RED HOT + 0728

Segment : Red dry Thin short

Plant : Semi erect vigorous plant

Fruit :

- Fruit length 8 to 9 cm & 1 cm diameter
- Pungency Value 70000 to 75000 SHU & Color Value 80 to 90 ASTA
- Fruit store ability >9 month
- 1st in the market acceptance and price

Maturity : 100 to 110 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our RED farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

GREEN THUNDER-2006

Green Thunder-2006

Segment : Thin Long (Dual)

Plant: Strong semi erect plant with ChiLCV tolerance

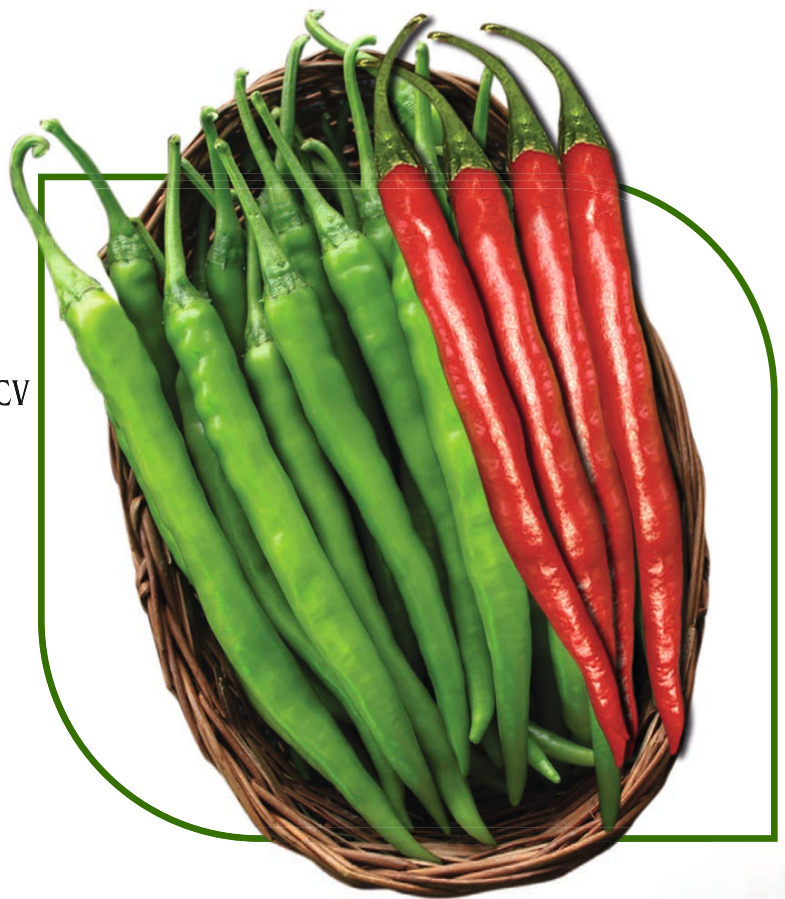

Fruit :

- Fruit length 14 to 16 cm & 1.2 to 1.3 cm diameter
- Medium green glossy fruit
- Good market acceptance and price

Maturity :

Green fruits : 60 to 65 Days

Red fruits : 90 to 100 Days

KING HOT-1102

KING HOT-1102

Segment : Green Fresh Thin short

Plant: Highly vigorous plant with broad leaves

Fruit :

- Fruit Length 8 to 9 cm & 1 to 1.1 cm diameter
- Dark green, glossy, very firm and pungent fruit
- Good shelf life of fruits
- Short fruit harvest interval (12 Days)
- 1st in the market acceptance and price

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

YOKOHAMA

YOKOHAMA

Segment : Open field

Plant: Strong and erect plants

Fruit :

- Fruit weight : 210 to 220 g
- Blocky shape firm fruits with very good uniformity
- Dark green color fruits with better shelf life

Maturity : 60 to 65 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

DELISHA-2037

DELISHA-2037

Segment : Open field

Plant: Strong, erect and tall plants

Fruit :

- Fruit weight : 180 to 200 g
- Blocky shape fruits with very good uniformity
- Green to dark green color fruits with good shelf life

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

SOWMYA-1 130

SOWMYA-1 130

Segment : Pentagone

Plant : Medium tall plants with excellent branching habit

Fruit :

- Dark green, smooth, tender fruits
- Fruits have very good keeping quality

Maturity : 40 to 45 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

SIMBA-0895

SIMBA-0895

Segment : Pentagone

Plant: Dwarf plant habit with good sympodial branches

Fruit :

- Fruits are tender and dark green
- Easy for picking
- Very short internode distance
- Durable resistance to YMV and ELCV

Maturity : 42 to 45 Days

NEW

SHAMBHO-1905

SHAMBHO-1905

Segment : Pentagone

Plant : Medium tall plants with excellent branching habit

Fruit :

- Dark green, smooth, tender fruits with uniform thin pentagone shape
- Fruits have very good keeping quality
- Intermediate resistance to ELCV

Maturity : 40 to 45 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

LEO-1278

LEO-1278

Segment : Pentagone

Plant: Dwarf plant habit with good sympodial branches

Fruit :

- Fruits are tender and dark green
- Easy for picking
- Very short internode distance
- Resistance to YVMV

Maturity : 45 to 48 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

RED ROCK-1035

RED ROCK-1035

Segment : Acidic_UG

Plant: Semi-determinate plant habit with good foliage

Fruit :

- Round shape fruits, red color fruit with good firmness
- Fruit weight : 90 to 100 g
- Intermediate resistance to Bacterial wilt and Late blight

Maturity : 60 to 65 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

RED PUSHPAK-1031

RED PUSHPAK-1031

Segment : Acidic_UG

Plant: Semi-determinate plant habit with good foliage

Fruit :

- Round to flat round shape fruits with good firmness
- Good heat setting
- Fruit weight : 90 to 110 g
- Intermediate resistance to Bacterial wilt
- Resistance to TYLCV & Late blight

Maturity : 60 to 65 Days

NEW

ADHIRA-1256

ADHIRA-1256

Segment : Acidic_GS

Plant: Semi-determinate plant habit with good foliage

Fruit :

- Flat round shape fruits with highly sour taste
- Good heat setting
- Fruit weight : 90 to 110 g

Maturity : 60 to 65 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

RED ANGEL-1025

RED ANGEL-1025

Segment : Acidic_GS

Plant : Semi-determinate plant habit with good foliage

Fruit :

- Semi flat round, firm fruits with green back
- Excellent sour taste fruits with better shelf life
- Fruit weight : 90 to 100 g
- Resistance to TYLCV

Maturity : 60 to 65 Days

MAHABALI-6717

MAHABALI-6717

Segment : Acidic_UG

Plant : Semi-determinate plant habit with good foliage

Fruit :

- Round shape fruits with good firmness.
- Good fruit setting
- Fruit weight : 90 to 120 g
- Intermediate resistance to Bacterial wilt
- Resistance to TYLCV

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

SAKATA-1670

SAKATA-1670

Segment : Roma

Plant : Semi determinate and strong dark green foliage

Fruit :

- Oval shape fruits with good firmness
- Good fruit setting
- Fruit weight : 90 to 100 g
- Resistance to TYLCV
- Intermediate resistance to Bacterial wilt and Late blight
- Good heat set
- Excellent Rejuvenation

Maturity : 60 to 65 Days

RED DOLLAR-1197

RED DOLLAR-1197

Segment : Roma

Plant : Semi-determinate plant habit with good foliage

Fruit :

- Oval shape fruits with good firmness
- Good fruit setting
- Fruit weight : 90-110 g
- Intermediate resistance to Bacterial wilt and good heat set

Maturity : 60 to 65 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

ROBINHOOD-1220

ROBINHOOD-1220

Segment : Roma

Plant: Semi-determinate plant habit with good foliage

Fruit :

- Square round elongated fruits with red color
- Good fruit firmness
- Fruit weight : 90 to 100g
- Uniform fruit shape and size
- Good heat set
- Intermediate Resistance to Late blight, Bacterial wilt & TYLCV

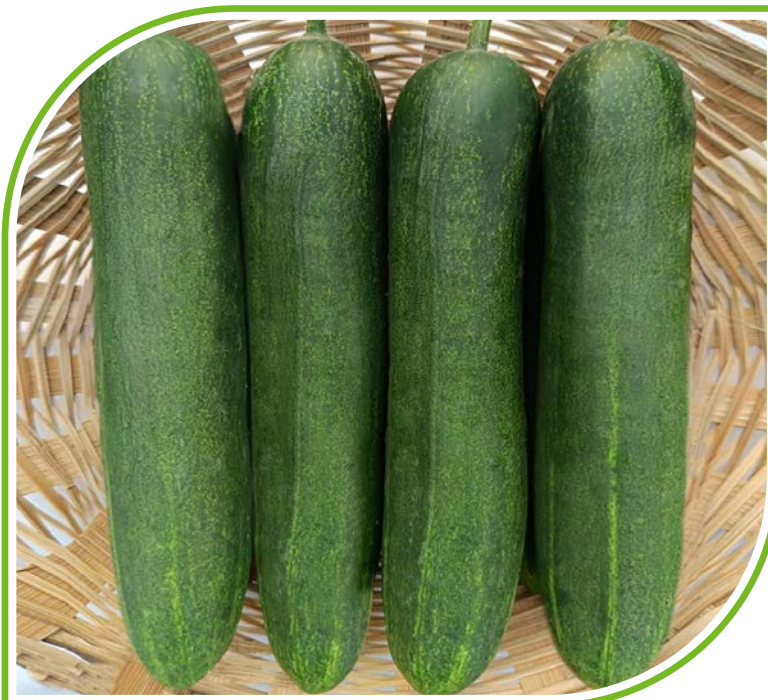

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

RACE-0532

RACE-0532

Segment : Green Long

Plant : Vigorous plant

Fruit :

- Dark Green fruit colour with bitter free
- Fruit length : 20 to 22 cm with 4 cm fruit diameter
- Fruit weight : 200 to 220 g
- High market acceptance

Maturity : 42 to 45 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

GRACE-0530

GRACE-0530

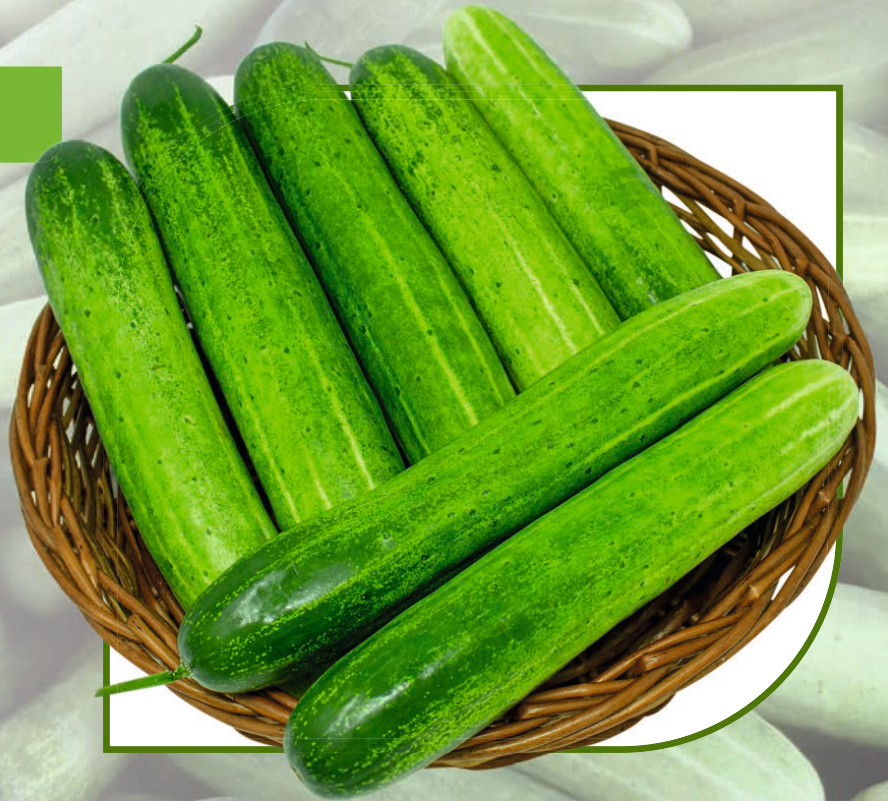

Segment : Green Long

Plant : Strong plant with dense foliage

Fruit :

- Fruit length : 22 to 24 cm
- Fruit diameter : 4 cm
- Fruit weight : 220 to 250 g
- Medium green fruit colour with bitter free
- High market acceptance

Maturity : 42 to 45 Days

SHIRAKAWA

SHIRAKAWA

Segment : White Green long

Plant : Strong vine with good foliage

Fruit :

- Fruit weight : 160 to 180 g
- Fruit length : 16 to 18 cm
- Uniform, cylindrical, white fruits with green tinge

Maturity : 45 to 48 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

YODHA-2252

YODHA-2252

Segment : Short Spiny

Plant: Strong and vigorous vines habit

Fruit :

- Dark green glossy color,
- Spindle shape fruits with sharp spines
- Fruit weight : 50 to 60 g
- Fruit length : 9 to 11 cm
- High yielding potential with Prolific fruit bearing
- Excellent market acceptance
- Field resistance to ToLCNDV

Maturity : 50 to 55 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

GREEN SHARK

GREEN SHARK

Segment : Short Spiny

Plant: Strong and vigorous vines habit

Fruit :

- Dark green glossy color fruits with sharp spines
- Fruit length : 9 to 11 cm
- Fruit weight : 50 to 60 g
- High yielding potential with Prolific fruit bearing
- Excellent market acceptance
- Field Resistance to ToLCNDV

Maturity : 50 to 55 Days

NEW

KANIKA-2692

KANIKA-2692

Segment : Medium Long Green Spiny

Plant : Strong and vigorous vines habit

Fruit :

- Dark green color fruits with sharp spines.
- Fruit length : 14 to 16 cm
- Fruit weight : 130 to 140 g
- High yielding potential
- Excellent market acceptance
- Field Resistance to ToLCNDV

Maturity : 45 to 50 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

AMIRA-0308

AMIRA-0308

Segment : Long Green Spiny

Plant: Strong and vigorous vines habit

Fruit :

- Uniform green long fruits with blunt spines
- Fruit length : 25 to 30 cm
- Fruit weight : 200-250 g
- High yielding potential suitable for long duration harvest
- Good market acceptance
- Suitable for long transportation

Maturity : 60 to 65 Days

LEENA-7005

LEENA-7005

Segment : Medium long green smooth

Plant: Strong and vigorous vines habit

Fruit :

- Fruit length : 14 to 15 cm
- Fruit weight : 100 to 120 g
- Attractive dark green shiny fruits with blunt spines
- Good shelf life and Market acceptance

Maturity : 40 to 45 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

DISHA-8001

DISHA-8001

Segment : Long Cylindrical

Plant : Vigorous plants with profuse yielding ability

Fruit :

- Uniform cylindrical fruits with attractive shiny green color
- Fruit length : 40 to 45 cm
- Fruit weight : 300 to 350 g
- Slow seed maturity with good color retention ability

Maturity : 50 to 55 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

KONIKA-8013

KONIKA-8013

Segment : Round with neck

Plant: Strong plant vigor with profuse yielding ability

Fruit :

- Fruit shape is round with neck
- Light green shiny fruits
- Fruit weight : 600 to 700 g

Maturity : 55 to 60 Days

NEW

TILELAO-8072

TILELAO-8072

Segment : Round shape green with speck

Plant : Strong plant vigor with profuse yielding ability

Fruit :

- Fruits are smooth, dark green with white specks round shape
- Fruit weight : 500 to 600 g

Maturity : 45 to 50 Days

NAKUL

NAKUL

Segment : Flat Round with Green Patchy

Plant : Vigorous plants with profuse yielding ability

Fruit :

- Fruit weight : 1.5 to 2.0 Kg
- Green skin with yellow speckles
- Yellow flesh colour
- High yield potential and long shelf life
- Suitable for long transport

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

BHIMA

BHIMA

Segment : Small Size (Dark Green Flat Round)

Plant: Vigorous plants with profuse yielding ability

Fruit :

- Very good fruit setting
- Attractive flat round fruit shape
- Fruit weight : 2 to 3 Kg
- Good internal color
- Excellent shelf life

Maturity : 70 to 75 Days

BRAHMA

BRAMHA

Segment : Medium size (Dark Green Flat Round)

Plant: Vigorous plants with profuse yielding ability

Fruit :

- Very good fruit setting
- Attractive flat round fruit shape
- Fruit weight : 5 to 6 Kg
- Good internal color
- Excellent shelf life

Maturity : 75 to 80 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

RADHA-0067

RADHA-0067

Segment : Green Short Cylindrical

Plant : Vigorous plants with profuse yielding ability

Fruit Traits :

- Uniform cylindrical tender attractive shiny green color fruit with prominent smooth ridges
- Good fruit color retention ability
- Fruit length : 30 to 32 cm
- Fruit weight : 180 to 200 g
- High fruit yielder
- Field resistance to ToLCNDV

Maturity : 40 to 45 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

MEERA-0121

MEERA-0121

Segment : Green Medium Cylindrical

Plant: Vigorous plants with profuse yielding ability

Fruit :

- Uniform cylindrical tender attractive green color fruit with prominent smooth ridges
- Good fruit color retention ability
- Fruit length : 35 to 40 cm
- Fruit weight : 220 to 250 g
- High fruit yielder
- Field resistance to ToLCNDV

Maturity : 40 to 45 Days

NEW

RAKSHAK-0118

RAKSHAK-0118

Segment : Green Long Cylindrical

Plant : Vigorous plants with profuse yielding ability.

Fruit :

- Strong, vigorous plants with good branching
- Fruit length : 45 to 50 cm
- Fruit weight : 260 to 300 g
- Uniform attractive green color fruit
- Field resistance to ToLCNDV

Maturity : 40 to 45 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

JUHI -8701

JUHI-8701

Segment : Dark Green

Plant : Strong, vigorous plants with good branching

Fruit :

- Fruit length : 28 to 30 cm

- Fruit weight : 160 to 180 g

- Attractive dark green fruits

Maturity : 40 to 45 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

HAMSA-8702

HAMSA-8702

Segment : Lite Green

Plant : Strong & vigorous plants with excellent branching habit

Fruit :

- Early maturity hybrid, prolific and continuous bearer
- Fruit length : 25 to 30 cm
- Fruit weight : 150 to 170 g
- Attractive light green and tender fruits

Maturity : 35 to 40 Days

NEW

SEETA-8910

SEETA-8910

Segment : Lite Green with White seeded

Plant : Vigorous foliage with early maturity

Fruit :

- Lite green smooth fruit with white seeded
- Fruit length : 25 to 30 cm
- Fruit weight : 160 to 180 g
- High Yield

Maturity : 40 to 45 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

YELLOW BOX

YELLOW BOX

Segment : Novelty Yellow flesh

Plant : Strong and vigorous

Fruit :

- Oval shape with green strip
- Yellow color crispy flesh
- Fruit weight : 3.5 to 4 Kg
- High sweetness 15% Brix Value

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

MARIKO-4016

MARIKO-4016

Segment : Ice box

Plant : Strong vigorous vines

Fruit :

- Excellent fruit quality and taste with 13 to 14% Brix value
- Blackish skin colour with oblong shape fruit
- Fruit weight : 5 to 6 Kg
- Suitable for long transport

Maturity : 65 to 70 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

SWEET HEART

SWEET HEART

Segment : Tropical

Plants : Vigorous uniform plants

Cob:

- Cob weight : 700 to 800 g
- Good Ear tip filling and kernel row arrangement
- Attractive bright yellow colour of kernels
- 13 to 14% Brix value and excellent taste
- Suitable for Processing and Fresh purpose

Maturity : 80 to 85 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

SWEET QUEEN-0174

SWEET QUEEN-0174

Segment : Tropical

Plants : Vigorous uniform plants

Cob:

- Cob weight : 600 to 700 g
- Good eartip filling and kernel row arrangement
- Attractive bright yellow colour of kernels
- 14 to 15% Brix value and excellent taste
- Suitable for Processing and Fresh purpose

Maturity : 85 to 90 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

SUPREME ORANGE

SUPREME ORANGE

Segment : Orange colour

Plant : Semi tall plant with good branching (2 to 3 feet plant height)

Flower :

- Flower weight : 15 to 16 g
- Compact, ball shape and attractive deep orange flowers
- 1st in the market acceptance and price

Maturity : 40 to 42 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

YELLOW STAR

YELLOW STAR

Segment : Yellow colour

Plant : Tall strong plant with high branching (>3 feet plant height)

Flower :

- Flower weight : 17 to 18 g
- Ball shape flower with high compactness and shelf life

Maturity : 40 to 42 Days

NEW

MALHAR-0081

MALHAR-0081

Segment : Yellow colour

Plant : Tall strong plant with high branching (>3 feet plant height)

Flower :

- Flower weight : 10 to 12 g
- Highly compact and Ball shaped flowers
- Better shelf life of flowers
- High yield potential

Maturity : 45 to 50 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.

NEW

CHINTAMANI-0079

CHINTAMANI-0079

Segment : Orange Colour

Plant : Tall strong plant with high branching (>3 feet plant height)

Flower :

- Flower weight : 14 to 15 g
- Compact and Ball shape flowers
- Good shelf life of flowers
- High yield potential

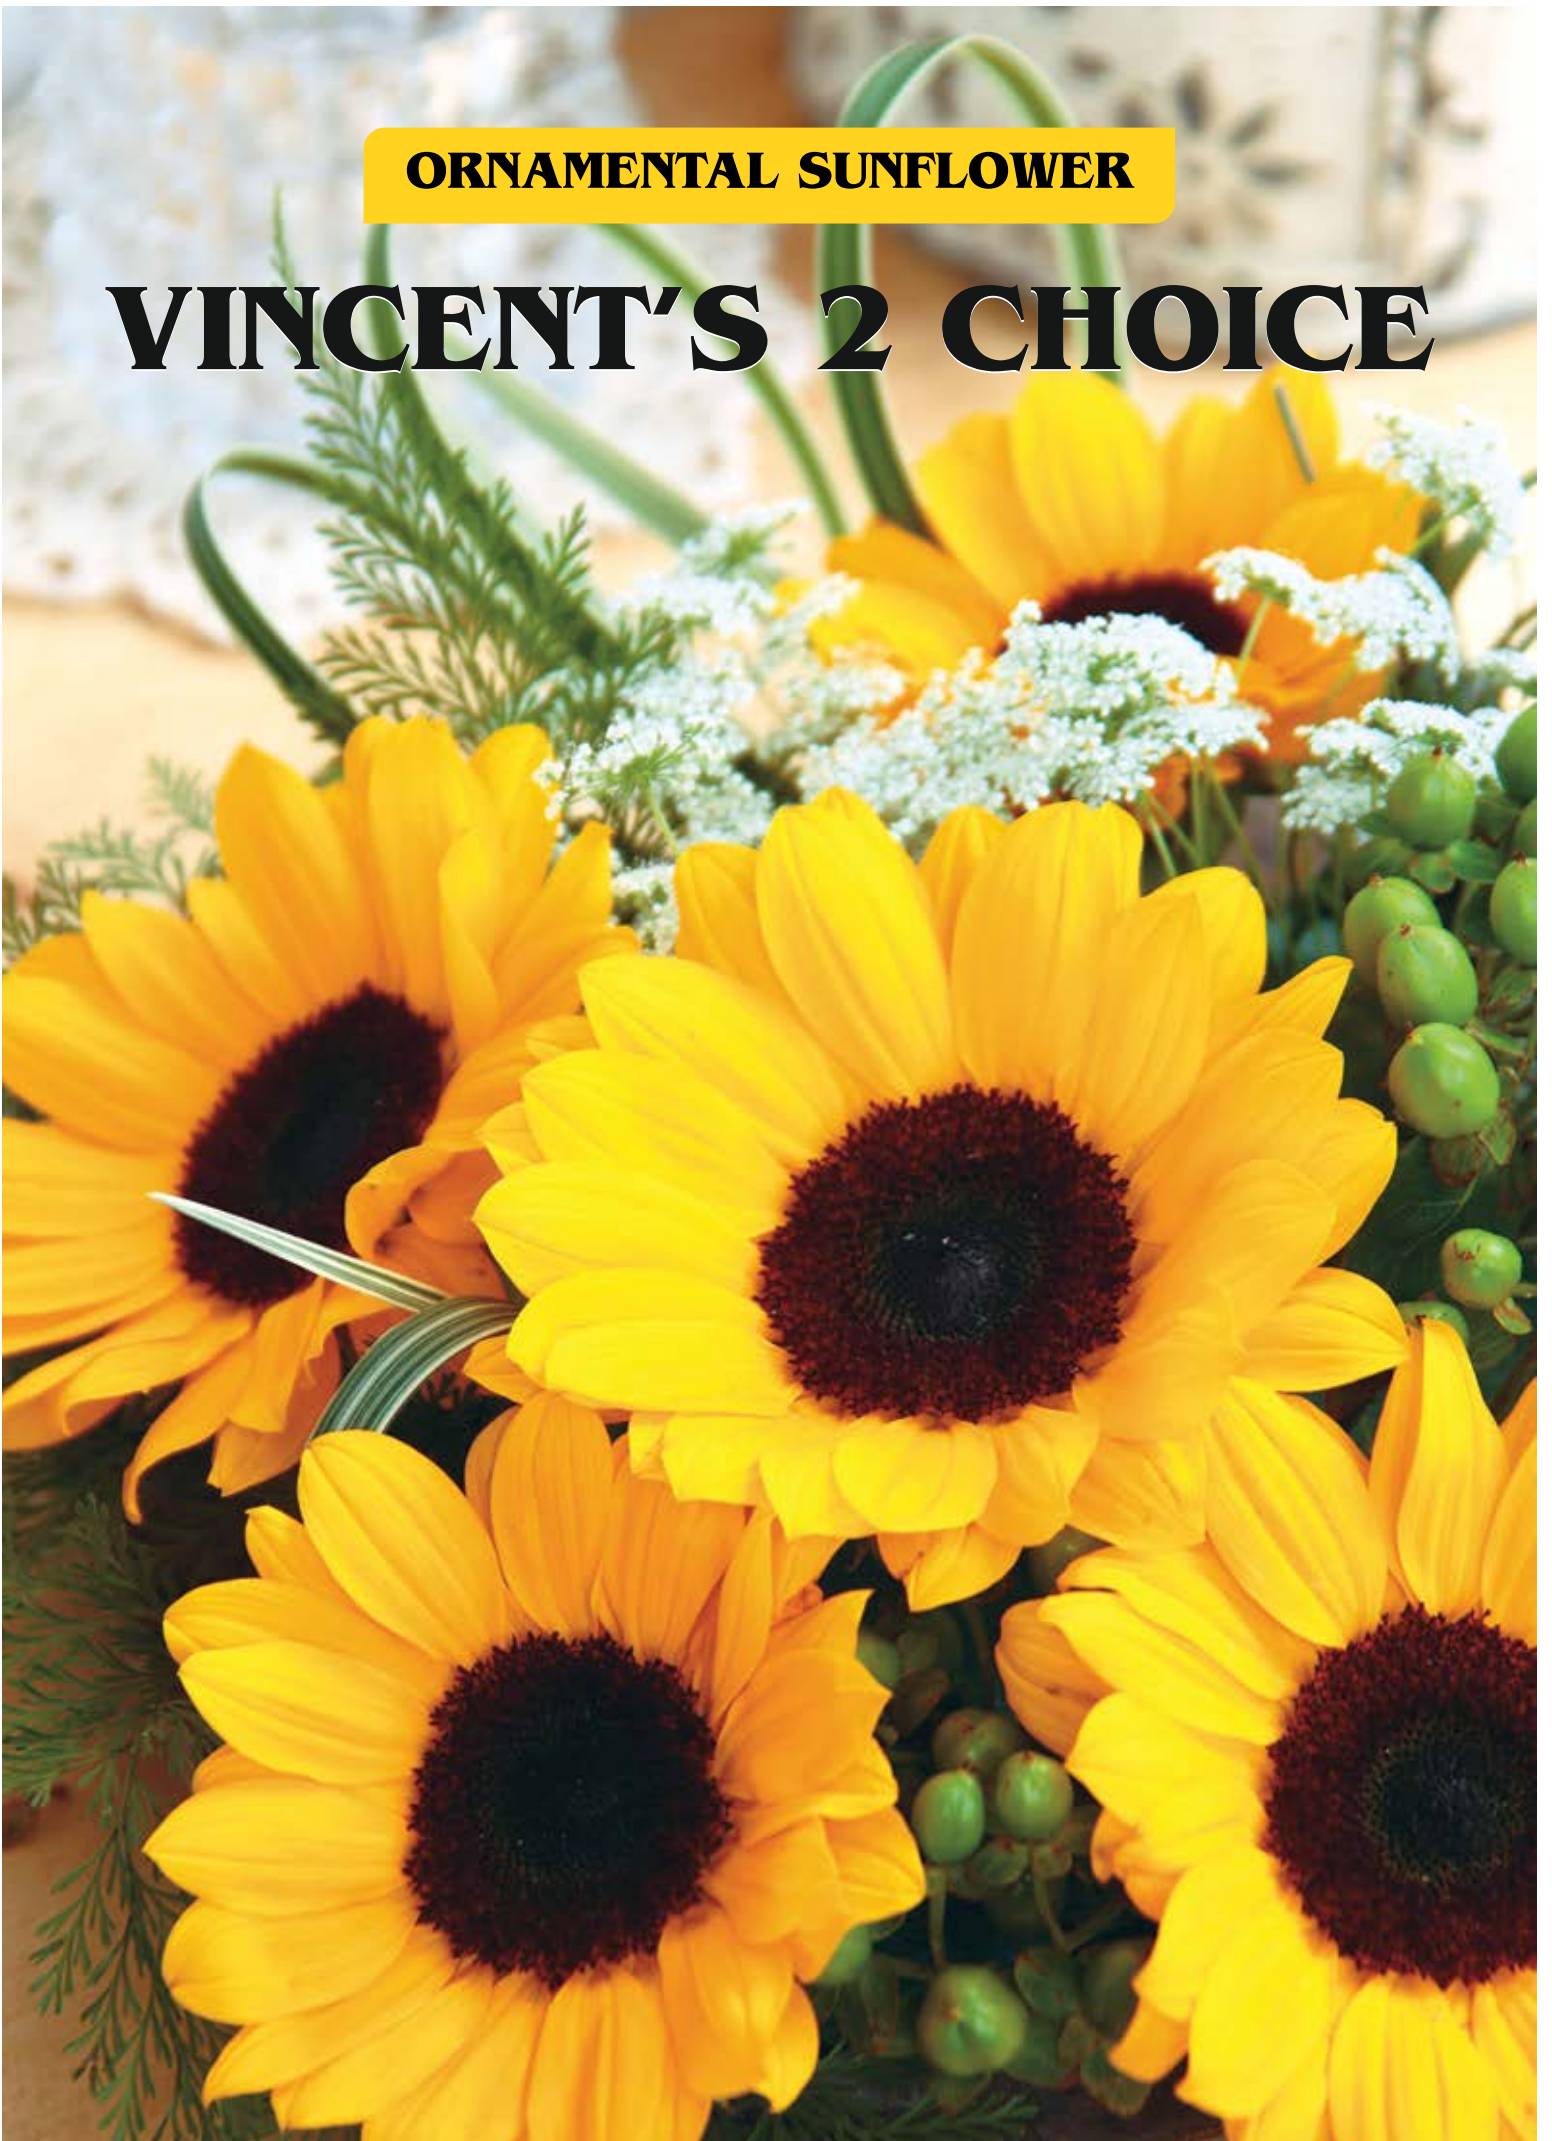

Maturity : 40 to 45 Days

NOTE: The hybrid characteristics given above are based on trials conducted at our R&D farms. The maturity & other performance depends on location, Sowing season, Agro-climatology & Crop management.
